

State and national benchmarks for MA & PDP CAHPS survey, 2018 -final

Note: Data are weighted to reflect state enrollment of each contract. States are omitted if the effective sample size for estimation of a state mean is less than 350. Effective sample size equals the nominal sample size/design effect (Kish, 1965). Estimates on the 0-100 scale are rounded to the nearest point

*Benchmarks for the “Rate Plan” item in FFS are not comparable to MA because the item is different (rating of Medicare rather than of an MA contract).
